Introduction	9
I.	
Forwarding challenges in the state-regulated transport market (1930/45 to 1986)	19
1. Company foundation in a difficult environment: The entrepreneurs Thomas and Anna Dachser (1930 to 1950)	21
2. Expansion strategy under the sign of the “economic miracle” and European integration	31
Network development and “network policy”: Building the national groupage network	31
Freight transport market development and gradual liberalization.	
Forms of competition in the state-regulated transport market	37
The struggle to optimize network efficiency: Quality policy and production conditions for forwarding services	44
The beginnings of European international business	59
Structure and development of the management organization:	
Corporate governance beyond family patriarchy	68
3. Strategic reorientation under the influence of creeping deregulation	78
Diversification and quality strategy: Reactions to the beginnings of cut-throat competition	78
The struggle to find the right IT strategy	88

A new contributor that poses a considerable management challenge: The difficult move into the food logistics segment	93
Cooperation instead of going it alone: Dachser, Deutscher Paket Dienst (DPD) and the move into courier, express and parcel services logistics (CEP)	101
Conquering the European forwarding and transport market and first attempts to integrate the national and international networks	104
Modernization and professionalization of the management and organiza- tional structures	111
Investment policy and financial planning	119
Preliminary summary	129

II.

Expansion and transformation in the wake of the liberalization of the transport market and globalization

(1987 to 2005)	131
1. The new transport market order and the logistics revolution	135
Market segmentation, industry development and competition	135
The merger of two family-owned companies: The integration of Transports Graveleau into the “Dachser network”	151
2. “Intelligent Logistics”: Dachser’s transformation in the area of information logistics	171
From free-standing solutions to industry standard. The development of cross-company consignment and package control	178
3. National systems networks and the transnational network strategy	195
From vision to reality: The establishment of a national systems network and the company’s transformation into a Euronational network provider	197
The “Mobile” project: The long road to becoming a Euronational network provider	211

Network management between global and industry-specific challenges: Aspects and problems of further network control	219
From the intercontinental network to the global logistics network: The road to the integration of air and sea freight logistics into the overall network	227
Against the trend: Industry solutions, contract logistics and the development of new network-based logistics concepts	238
Value-added services, Logistics Consulting and contract logistics	248
4. The restructuring of corporate governance and the development of the management organization: A family-driven model	254
Management organization and management strategy	255
The second change in generations and the new partnership agreement	269
Aspects of the corporate culture: Personnel development and staff orientation	281
Conclusion	295

Appendix

Speech held by the two major shareholders to mark Dachser's 75th anniversary in Munich on 28 April 2005	303
